

Homes And Jobs Needed

Position Of Young Men On Road Not Happy One

Comments from railway travellers about the large number of boys seen riding on freight trains have been substantiated by conservative authorities who estimate that between 200,000 to 300,000 youth from twelve to twenty years of age are now "on the road." Another "roving army" of jobless youths is reported in Great Britain. Russia has been troubled by bands of children wandering about the country stealing what they could find.

The wanderers here represent a new type. They are neither lazy nor adventurous. They are not criminals inclined. In fact, some of them are fairly well educated. Broken homes reduced family incomes and unwillingness to remain a burden on an already large family were responsible for their wanderings. There is not a happy one. Last winter a western city reported taking from freight trains thirty-five men and boys who were seriously ill. One railroad has reported fifty young men and boys killed and a hundred others injured during a single winter as the result of hopping trains. The best the wanderer can hope for in a town is two meals of bread, coffee and beans and the admission to "move on."

Although a publicity campaign is planned to give warning of the dangers of "taking to the road" it can hardly be expected to prove a complete remedy. Both homes and jobs are needed to keep these young men off the road.—New York Evening Post.

Toll-Bridge Keeper

Collects Rare Coins

Has One Half Dollar Which Is Centuries Old

Collectors of old and rare coins are advised to take jobs as collectors on toll bridges, if they can get them, in order to augment their collections. The experience of employees of the toll bridge at Sunbury, Pennsylvania, justifies the advice.

A. A. Wheeland, one of the collectors here, reported he had a half-dollar coined in 1831. The coin was larger than the present 50-cent piece and caused Wheeland to hold up the motorist who gave it to him until the money could be examined. On one side was a head of "Miss Liberty" and on the other a spread eagle. On the edge were inscribed the letters "FIFTY CENTS." Convinced of its authenticity, Wheeland gave the motorist 60 cents change.

Other curious coins recently taken in by Wheeland included an English piece of silver, a Cuban coin and other foreign money.

Act As Rest Cure

Dull Days Make People Responsive To Stimulus Of Sunlight

Sir Henry Gwynne of England, discussing the effects of sunlight on health, said: "Our dull winters are all to the good. They are a rest cure which is very beneficial. When the sunlight comes back we are in a position to respond to that stimulant." "When the Daylight Saving Bill was introduced, people were concerned about the health of children. Staying up late at night they said could only do harm. The effects are entirely different. I have never heard of any authentic cases in which the extra hour has caused harm to the health of a child. Though there is more mental activity the child is able to respond without fatigue. In Norway in summer, the children play in the streets in the middle of the night, go to sleep just when they feel like it, and they seem none the worse for that. In the dead winter with no sun they almost hibernate, and are dull and dispirited."

"Dad, lend me your pocket knife."
"What for, son?"
"To carve my name on the dining room table." — Bonadonna-Strick, Stockholm.

W. N. U. 1960

PEACOCK IN FULL DRESS PARADE IN BEACON HILL PARK, VICTORIA, BRITISH COLUMBIA

Four Royal Golfers

Sons Of King George Are Enthusiastic Over Game

The Prince of Wales's enthusiasm for golf has secured another royal convert, the Duke of Gloucester. The Prince was the first to catch the golfing fever, and he was very quickly followed by the Duke of York, who when he is in practice makes a very level match of it. Not long ago Prince George took to the game and had lessons from Archie Compston. He shows the same keen desire for practice as the Prince of Wales. And now the Duke of Gloucester has been playing golf while at Cowes with members of the Royal Yacht Squadron, and is planning to join a club in Berkshire. That means that all four brothers are now golfers, and I imagine that before long there will be some pretty tense battles between them for they are keen rivals in sport. Prince George, doubtless will keep up his tennis and his love for playing the piano. Few people realize what a talented pianist he is, both of modern and classical music. He has the useful gift of being able to play over a tune he has only heard once.

Walking Comes Back

Many City People Renewing Interest In Healthful Exercise

Walking seems to be regaining its dignity. New York people who used to drop in to the subway to go to work or to the office are now walking and saving their nickel.

Walking for pleasure is also on the rise. There is not so much evidence of hordes of week-end hikers ostentatiously dressed for making mileage. But great numbers with unassuming dress are on their hands and feet walking in pleasant and healthful. They are eager to learn of quiet roads, free from dangerous traffic, shady and rustic-scenery.

In 1935 the Newark public library listed "Walks Near Newark," some twenty short trips. The list was revised from time to time, until the obliquity of the motor car made many lose the taste or the opportunity for walks. Renewed interest now prompts the library to ask for fresh suggestions about enjoyable trips from individuals or walking clubs.

Enforcing the Migratory Birds Act

Officers of the Royal Canadian Mounted Police, acting for the National Parks Branch, Department of the Interior, which administers the Migratory Birds Convention Act in Canada, seized at Ottawa recently three live bobolinks (gophers) which were being kept in captivity as cage birds. The birds were taken to Rockcliffe Game Preserve and released in congenial surroundings. Practically all wild birds are protected by Dominion and Provincial law and may not be kept in captivity. Persons violating these laws are liable to heavy penalties.

Detects the Bumps

A railroad company in England runs an engine which is called the "whispering special." The train carries no passengers, but it is equipped to note every jolt and bump on the tracks. As a bump is hit, a splash of white paint is dropped on the ground to mark the spot for repair crews.

Guest (at country inn): "Charming place this is—seen the old wing?"
Second Guest: "Oh, yes, had it for lunch."

Don't fudge a man by his size. The biggest fiddle in the orchestra plays the finest notes.

New Zealand's butter output has increased 7 per cent. in the last year.

Men Most Careless

In Crossing Street

Women Show More Seize Opinion Of Winnipeg Traffic Officer

"Men are dumber than when they come to crossing the street without ending up on a stretcher," says a Winnipeg policeman. He spoke as if he knew what he was talking about. More than 20 years of watching traffic and traffic-draggers had given him plenty of experience.

"Men," he continued, "will walk in the path of an oncoming auto and time themselves so that it will barely miss them. They like to take chances and show off, especially the younger fellows. And you'll see them duck into a stream of moving autos and dodge their way across the street just to save a few seconds. Women show more sense."

With men it's most often a case of not looking where they're going. They have their minds on a business problem, or a golf game or on nothing in particular, and the next thing they know they're doing a loop. "It's hard to believe," said one civic official, "but I know of cases where a man has walked slap into the side of a street car, apparently without knowing it was there until he hit it—and I've yet to see the man who can tackle a street car with any success."

With women, accidents usually result from their getting excited. They see, for instance, an approaching street car which they want to catch and they get so excited about getting to the tracks in time to flag it that they run into the path of an auto.

New Evolution Of Science

Frozen Dried Will Keep Sweet For Several Months

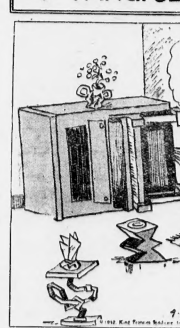

Modern Science is always coming to the fore with some new wrinkle which extends the market for farm products. One of the latest evolutions is frozen sweet cider. When it comes from the press cider is frozen to zero degrees F. and held at that temperature until thawed for sale or use. When thawed out it is perfectly fresh and sweet. It will keep several months or more held at zero, and there is every prospect that it may be developed into an important beverage outlet or by-product for orchardists.

FANCIFUL FABLES

Sends Gift By Telegraph

Clerk's Resourcefulness Helps Worried Husband Out Of Difficulty

There is a familiar story about the old lady in the telephone office: "What the young man, if you're smart you can send flowers and money by wire. I can't see why you can't telegraph an umbrella."

Maybe it could be done at that. Down in New York there is a grateful wife—grateful because her husband, though in Montreal, remembered her birthday. The husband is grateful for a telegraph clerk's resourcefulness, and in the Montreal office of Canadian National Telegraphs there is a clerk who declares that helping out harassed customers is all part of the day's work.

For a few moments, however, this touring husband presented a problem. It was his wife's birthday, she was in New York, and he had forgotten to arrange a present for the occasion. Could the telegraph company help him out? They could and did. The clerk, with memories of having been handed a pot of flowers and asked to send them by wire, or a canary in a cage, suggested that perhaps friend husband would like to transmit a real present. A nice handbag, for instance, was suggested. The arrangements were made by wire with New York, a handbag was purchased to be delivered at once to the tourist's home address. Life was again serene and the birthday had been duly and fittingly remembered.

Insect Eating Plants

Michigan Swamps Are Home Of Three Common Ones

Three common insect-eating plants inhabit the swamps of Michigan—the pitcher plant, sundew and the bladderwort.

The pitcher plant, which blooms in June and July, takes its name from the fact that its leaves are the replica of a pitcher. The bottom of the leaf is filled with a sweet fluid which attracts the insects. Down the pointing hairs lining the sides of the leaves facilitate the descent of the prey.

Equally bloodthirsty is the sundew. This plant is covered with numerous hair-like projections upon which are drops of a sweet fluid like dew. Attracted to these drops, insects fall between the hairs and are trapped.

The bladderwort grows in the wetlands and is equipped with tiny bladders to entrap all sorts of insect life.

Live Stock Feed

Investigation Work Under Way To Determine Relative Value Of Different Products

The ruinous prices of grain during the last couple of years has aroused special interest in the relative value of different kinds of live stock feed. Early in 1931, wheat pool officials appealed to the Grain Research Committee, stating that in the preparation of a circular dealing with the subject, they had found great difficulty in finding authoritative published information, and asking whether something could not be done to summarize the results of feeding experiments, particularly in regard to barley, a home-grown product, and corn, a product largely imported.

The Committee found on inquiry that Professor E. W. Crampton, of Macdonald College, had already started some work along this line. They made a grant to assist him in extending the scope of his investigation to cover all the modern published literature available on the comparative value of wheat, oats, barley, rye and corn for feeding horses, cattle, sheep and swine. Poultry feeding, it may be remarked in passing, is now the subject of a special investigation by Professor Hermer, of the University of Saskatchewan, assisted by the National Research Council. Professor Crampton's report should be ready for publication before the end of the current year. It will not only give extremely useful information on the value of these grains for feed, as shown by a statistical study of the results of over seventeen hundred experiments, but it will also indicate some of the lines along which future animal feeding experiments might profitably be directed.

Fifteen Miles Per Hour

Speed At Which Harnsworth Trophy Was Once Won

The Harnsworth Trophy and speed on water have become synonymous in recent years. But it was not always so.

With Gar Wood's "Miss America" and Kaye Don's "Miss England III," such capable speeds as 120 miles an hour—it is almost inconceivable to imagine that the trophy once changed hands with a speed of 15 miles an hour. Yet, it is true.

Back in 1946, three years after the late Lord Northcliffe (then Sir Alfred Harmsworth) placed the trophy in competition, Lord Montagu of Beauchamp and L. de Rothschild, of England, built a challenger, "Tarrow-Napier" and sailed across the English Channel to France in an attempt to regain the trophy.

It was in this race that America's first bid for the trophy, W. Gould Browne, of New York, went aboard with a boat he chose to call the "Challenger." On the trip across the Atlantic, "Challenger" lost her protecting hull. The boat was raced with engines uncovered and heated with only three of her six cylinders burning. At that she was beaten by only two minutes and the winner was "Tarrow-Napier" that made the crossing in the amazing speed of 15 miles an hour.

That's a far cry from the present speeds, but it happened only 26 years ago.

Winning the Harnsworth with 15 miles an hour—it sounds like fiction when you look at the monstrous Wood and Don record in this year's events.

Telephone Manners

Being Courteous Over 'Phone Great Asset In Business

Phone manners might well be made a compulsory study in the schools, business schools, at least. Everyone knows how nice it is to hear a pleasant voice over the telephone, and the reverse, cold, crisp, sarcastic or even hostilely abashed of the burst of temper. Good nature on the telephone is worth much money in the business world and much comfort in the social world.

A London department has been installed for public inspection a seismograph, an earthquake recording instrument.

The Anglo-Irish Dispute

Britain Has Counted Cost and Empire Comes First

We must recognize that Britain and the Free State, under her present Government, have come definitely to the parting of the ways. The situation, in a sense, is strange, because, though it is almost definitely grave, there is here not the slightest excuse for passion or heroics. The Free State can become a republic tomorrow without the loss of a single drop of blood. She is as free to walk out of the British Commonwealth of Nations as a man is free to walk out of church. Britain offers no threats, and has not the least desire to be vindictive. On the contrary, all her transactions with Mr. de Valera's Government have abounded in goodwill. It is manifest, however, that Britain has counted the cost, and has decided that, as between Free State and Empire, she must choose Empire. She cannot afford to have an alien and distrustful element in the British Commonwealth of Nations.—Weekly Irish Times, Dublin.

Poor Sells Historic Abbey

Was Founded Thousand Years Ago By King Athelstan

"It has 67 bedrooms, and who in the world wants 67 bedrooms? I cannot possibly sleep in 67 bedrooms!" Thus Sir Eric Hambro, famous banker, explains why he sold rambling old Milton Abbey, historic Dorset seat of the Hambros—until to Sir Eric just an irritating "white elephant and a nuisance."

The name of the buyer of the venerable Abbey is not, for the present, made public.

Milton Abbey was founded a thousand years ago by King Athelstan, and remodeling the 14th century by the Benedictine friars.

Except for the monks' hall and the rectory—"a stately apartment with a roof of over seventeen hundred years," it was pulled down in 1771. The present house, with its 67 too many bedrooms, was built at that time by the Earl of Dorchester. This same Earl, in that same year of 1771, didn't like having the ancient tower of Milton so close to his home, so he demolished the tower, and built the model village of Milton Abbas at a more respectable distance!

The Hambro family came into possession of the Abbey with its clock, cold walls, 67 bedrooms, and family photo; and without plumbing or heating, about the middle of the last century.

Grains Alone Not Enough

Balanced Ration Is Necessary For Finishing Bacon Hogs

In order fully to realize the opportunity which is his in marketing bacon, the farmer of the prairie province, in particular, must realize that a fundamental fact that grains alone are not enough to make good hogs. Where milk in some form is available, the farmer, in addition to grain supplement, or balance, to the ration, but in many parts of Western Canada, in particular, milk in any form is scarce. In such cases tankage should be included in the meal mixture. It is an ideal supplement and adds zest to the feed even when milk is available in abundance. To make your home-grown feeds count you must feed a balanced ration, and tankage is a good means to this end.

A Doubtful Compliment

Guest—I wonder if you would mind giving me the recipe for that plum cake you served this afternoon at tea?

Hostess—Why, I'll be delighted to give it to you. But your wife makes the most beautiful plum cake I ever tasted. I know, but in this time of depression I want her to be more economical.

"Can I have tomorrow off, ma'am?"
"Yes, why do you ask?"
"I was thinking of getting married, but if it does not suit you, I can have another day." — Buen Humor, Madrid.

cigarette tobacco.

WORLD HAPPENINGS BRIEFLY TOLD

A suitable home for the Canadian legation in Tokyo may be expected in the very near future.

Jimmy Oates, first man to cross Canada by motorcycle, now plans to travel from Ottawa to Churchill.

Switzerland sent 2,200,000 pounds of milk and rayon products to Great Britain last year.

Thirty more Doukhobor men have been sent to Fiera Island. There are now about 100 men on the island.

Three Chinese boys have left Calgary for their homeland to join the Nationalist army air force. They were trained locally.

The report to the League of Nations on Manchuria advises establishment of Chinese autonomy under Japanese advisers.

The British Government has received no intimation from the United States regarding postponement of the world economic conference, expected to begin in London in October.

Lord Wakefield, owner of "Miss England III," fastest speed boat in the world, announced he would take no further part in motor boat speed contests.

Population contained within the area designated as Greater Vancouver, placed at 208,340, it is reported by the Dominion Bureau of Statistics.

Honey Producers May Expect Good Prices

Yield Over Whole Dominion Lighter This Year
Reports made by C. B. Gooderham, Dominion apiculturist, state there is about a 60 per cent. crop in Ontario, a little over 50 per cent. in Saskatchewan and 60 per cent. in Alberta.

While the honey crop in the Red River Valley is somewhat lighter on account of dry weather injuring the clover crop reports from central and northern Manitoba indicate a better crop than last year.

The favorable weather in the spring and early summer developed the clover crop about 10 days earlier than usual in Manitoba, with beneficial result to the honey harvest. According to Mr. L. T. Floyd, provincial apiculturist for Manitoba, producers may expect good prices in view of the fact that the yield over the Dominion is only about 80 per cent. normal.

Gift For King George

Two vases bearing the royal arms of Portugal, which were in the late King Manuel's English residence, Pall Mall, Twickenham, Middlesex, are bequeathed under his will to King George as a testimony of "deep gratitude for his many kindnesses."

Highland Society Bars Women From Membership

Not Even Royal Lady Can Pledge At Annual Festival

The Highland Society of London have decided to ask the Prince of Wales to preside at their next annual festival in June of next year. The decision to make arrangements so far ahead is due to the fact that the patronage of any member of the Royal Family can only be assured by making direct representations many months in advance. The Society is more or less precluded from inviting a Royal lady to preside at their annual festival as the Act of Parliament of 1816 and 1831, by which they have been incorporated, debar women from membership.

(By Ruth Rogers)

THE GUMPE DRESS HOLDS MUCH JOY FOR YOUNG LADIES GIRLS TO START FALL

Isn't this one fetching? It's very gay too! The dress is brown linen. Red and white plaided linen is used for the separate gump. Note how it buttons down the back. It can also be worn with a brown and white dotted button gump.

It's very simple to fashion it. And it requires the minimum of material.

Style No. 853 is designed for sizes 4, 6, 8 and 10 years.

Size 8 requires 1 1/2 yards 35-inch with 1 1/2 yards 2 1/2-inch blouse. For later fall wear, a cunning idea that is exceedingly smart is a two-piece mixture in wine-red tones with plain toning wool crepe gump.

Rayon mixtures and flannel woolens are attractive with plain tony gumps.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Plan World Cruise

Condor Cruiser "Carinthia" To Make Cruise Of Southern Hemisphere

The Southern Hemisphere will be circled for the first time by a cruise liner when the Condor cruiser "Carinthia" makes her world cruise next January, leaving New York on January 7th. The entire cruise will be made under the Southern Cross. The duration of the cruise will be 139 days with a distance of approximately 36,301 miles, calling at 35 ports.

After leaving New York the "Carinthia" will call at Kingston, Jamaica, then through the Panama Canal to California, Hawaii, down to the South Sea Islands, visiting in rapid succession those atolls of fabulous beauty and fascination, Tahiti, Havelonga, Samoa and the Fijis, continuing to New Zealand and Australia, New Guinea, the Dutch East Indies, including Bali and Java, the Strait Settlements, Ceylon, make a stop for the first time in the history of any cruise at the famous Seychelles Islands, (Port Victoria), down the coast of sunny East Africa from Mombasa to Cape Town, across the South Atlantic to Montevideo (for Buenos Aires), Santos, Rio de Janeiro, and back to New York. Practically all ports of the itinerary have seldom been visited by Canadian or American.

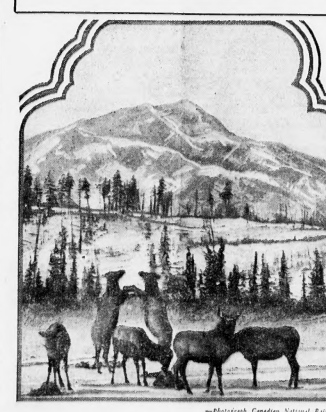

The cruise will be particularly interesting to Canadians in that a large number of British possessions will be visited, including Alaska, New Zealand, Australia, the Strait Settlements, Ceylon, Seychelles, Kenya, Zanzibar, Union of South Africa and Barbados.

The ship is due back in New York on the afternoon of Thursday, May 25th. The "Carinthia" is the newest steamer in the Cunard fleet, was especially constructed for cruising and is of 20,000 tons gross. The shore arrangements of the cruise are being managed by Thos. Cook & Son.

Ray Penetrates Fog

Apparatus for projecting an invisible ray that penetrates fogs has been installed on two new German liners. The beam is said to increase by ten times the distance through which the human eye can see and is as efficient by night as it is by day.

Do You Know?

THAT all the "Battles of the Century" are not fought in the shadow of Pyramid Mountain in Jasper National Park, Alberta, Canada, before an uninterested audience.

New Anti-Aircraft Gun

Claimed To Have Range Of Seven And Half Miles

That a new anti-aircraft gun can bring down an attacking bomber seven and one-half miles up in the air, is the claim to those conducting tests on the Riviera coast near La Seyne, France. The secret of the gun's structure is jealously guarded by the French engineers planned it. Anti-aircraft guns have previously proved effective at a height of about three and one-half miles, but modern aircraft can attain much greater altitudes. In the experiments off La Seyne an aeroplane with pilot and mechanic, ascended seven and one-half miles towing, suspended 1,000 feet beneath it, a target on which the anti-aircraft gun opened fire with live shells. Aviation, military and naval men of Europe are watching the tests.

Recipes For This Week

(By Betty Harency)

CRISP MALTOSA COOKIES

2 1/2 cups special cake flour, sifted.
1 teaspoon baking powder.
1 teaspoon salt.
2 teaspoons ginger.
1 cup molasses.
1/2 cup butter or other shortening.
2 teaspoons soda.
Sift flour once, measure, add baking powder, salt, and ginger, and add again. Heat molasses, remove from fire, add shortening and soda. Add flour gradually. Chill. Roll very thin on slightly floured board. Cut with floured cookie cutter. Bake in moderate oven (350 degrees Fahrenheit) 10 minutes. Makes 3 1/2 dozen cookies.

STUFFED PRUNE SALAD

2 packages cream cheese.
1 cup coconut, Southern style, chopped.
2 tablespoons mayonnaise.
24 cooked prunes, seeded.
Blend cheese, coconut, and mayonnaise. Stuff prunes with mixture. Serve on crisp lettuce. Garnish with additional mayonnaise. Serves 8.

SPECIAL MACARONI SALAD

2 cups cold cooked macaroni.
1 green pepper, chopped.
2 raw carrots, thinly sliced.
1 medium sized onion, chopped.
1 cup French dressing.
Eggless mayonnaise.
Combine macaroni, vegetables and French dressing. Add sufficient Eggless Mayonnaise to bind ingredients. Chill before serving. Serves six.

Old Orders Still Used

Some of the standing orders still in force in the House of Commons are over two centuries old. An old Norman French phrase is still in use in certain instances, notably "Le Roy se vult" (The King wishes it to be the Royal assent to a Bill).

Grapefruit trees normally do not flower until they are at least five years old; but after X-ray treatment grapefruit seedlings a month old produced small flowers.

Many Imprisoned For Debt

British Jails Crowded and Law May Be Revised

Revision of ancient British laws which imprison debtors is envisaged, because jails throughout the country are crowded with men and women who have failed to meet their obligations.

On any day of the year there are 850 debtors in British prisons. Approximately 15,000 were arrested last year for "writfully refusing to pay" their debts. This year there is a slight increase so far.

Director prison, London's jail for debtors, is full. Its daily population of debtors is 161. This class of prisoner accounts for about 20 per cent. of the prison population of the whole country.

An analysis of the debtors in British prisons shows that 418 were there under the Married Women's Act—failure to maintain their wives;

242 under affiliation orders, and 102 for non-payment of rates and taxes. None of them can be imprisoned twice for the same offence, but a percentage of those committed for wife maintenance, or affiliation orders, may serve several terms in jail during the year because they have not continued payment as soon as they were discharged from a previous term.

Solves One Problem

Press Buttons and Mechanical Cook Will Prepare Meal

One of the latest inventions in a mechanical cook which turns out pastries or coffee piping hot, eat to which of two buttons you press. And wonderful things are to follow. The inventor has already perfected a ham-and-egg machine; Press the button. Crack goes the egg whilst a slice of ham falls into the pan. As soon as it is cooked to a turn the machine delivers the dish.

A great future opens up for the invention. No longer will young husbands be reduced to nervous wrecks by the burnt-offerings of meat, the flint-like cakes, and the soggy pastry of young wives whose culinary attainments they must tolerate. What a promising marriage has been wrecked on the rocks of home-made buns. But all these tragic happenings will soon be things of the past.

Returning to a home provided with a multi-button cooker, Edwin, having embraced a smiling Angelina, will play out a dainty menu. Then buttons will be pressed and in a few moments the most wonderful meal will be served.—Trib-Trib.

Many Familiar Sayings

Quotations From Shakespeare Are In Use Every Day

Even the most illiterate quote Shakespeare every day. Indeed, most of us do not know we use quotations from the current sayings from the Bard of Avon's writings:

"Desd as a doornail; eaten out of both ends; as good luck would have it; mad as a March hare; a snake in the grass; a woman will not tell what she does not know; birds of a feather; care killed the cat; cake is dough; every dog has his day; fast bind, fast unbind; every man to his trade; familiarity breeds contempt; good wins needs no bush; make hay while the sun shines; past cure, past cure; platters have ears; poor and proud; sink or swim; speak by the card; the world on wheels; we burn daylight; woo in haste and wed at leisure; give the devil his due, and what the dickens?"

Ontario Is Interested

Province Experts To Be Well Represented At World's Grain Show

Ontario will be adequately represented at the World's Grain Show in Regina, July 24 to August 5, 1933. Hon. T. J. Kennedy, provincial minister of agriculture, said at a meeting of the show's Ontario committee at Toronto recently.

The minister advised the committee Ontario should be represented in the interregional and junior grain competition. Plans are being completed for holding grain judging competitions at several strategic points throughout the province to select representatives for a final competition at Guelph. There three Ontario representatives will be chosen.

Consideration was given the preparation of an educational exhibit at the show, representing the natural resources of the province.

Sixty-five per cent. of the manufactured products used in Argentina are imported from other countries.

Pelicans in flight move their wings in unison, taking their beat from the leader and keeping time with him.

Madame Lacroix's delicious CHOCOLATE LAYER CAKE

1 1/2 cup butter
1 cup sugar
2 eggs
1 teaspoon vanilla extract
1 cup milk
2 1/2 cups pastry flour (or 2 cups and 3 tablespoons of bread flour)
3 teaspoons Magic Baking Powder
1/4 teaspoon salt

Cream butter; add sugar, a little at a time, beating well; add beaten yolks and flavoring; add flour, sifted with salt and baking powder, alternately with milk. Fold in stiffly beaten egg whites. Bake in 3 greased layer cake pans in moderate oven at 375° F. about 20 minutes. Recipe for Chocolate King and Filling is in the Magic Cook Book.

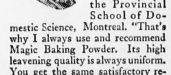

Why Magic Baking Powder is used exclusively at this

Montreal School of Domestic Science

"We teach our students only the best methods," says Madame R. Lacroix, Assistant Director of the Provincial School of Domestic Science, Montreal. "That's why I always use and recommend Magic Baking Powder. Its high leavening quality is always uniform. You get the same satisfactory results every time you use it."

And Magic Baking Powder is the unquestioned choice in the majority of cooking schools throughout the Dominion. Cookery teachers—and housewives, too—prefer Magic because of its consistently better results.

B. C. Government To Continue Until Next Session Of Legislature

Victoria, B.C.—The present government will continue until the next session of the legislature early in January, necessary legislation will be brought down, his cabinet will resign, a new government of union nature will be formed and if the proposed government is successful, the elected members may choose the man who shall be premier.

This was the programme for British Columbia, proposed in a statement issued by the province's premier, Hon. S. P. Tomin, Saturday night, September 17.

Dr. Tomin proposes that the cabinet of the proposed government shall be reduced from nine members with portfolios to seven with portfolios and from two without to one without portfolios, totalling eight instead of 11.

The membership of the legislature, at present 48, would be reduced to a point compatible with proper representation for the whole people.

"There will be a thorough reorganization of the cabinet after that reorganization representatives of other bodies will be afforded an opportunity to participate."

The premier does not forecast the date of his election beyond that "it will follow at the earliest possible date."

A very thorough study of the recent Kidd committee report on governmental matters will be made, and those proposals which are approved will be adopted.

Freight For Bay Route

Will Shortly Discontinue Solicitation Of Freight For Hudson Bay Route

Ottawa, Ont.—While the government takes no part in the operation of the Hudson Bay Railway and the Port of Churchill, the information that the Canadian National Railways will shortly discontinue the freight solicitation service for the new route is unofficially confirmed here.

The railway has been pushing the Hudson Bay route strongly in the past few months, but this effort will be stopped shortly prior to the closing of the Hudson Bay navigation season. The chief motive in discontinuing the service is to economize, but it is pointed that there is little purpose in soliciting freight for 1933 at this time.

Married School Teachers

Calgary, Alberta.—Women school teachers whose husbands earn good salaries may be dismissed by the Calgary School Board. At a recent meeting the school board decided to investigate and ascertain the number of women teachers who might take his former backer's place as sponsor of speed boat racing.

Lord Wakefield withdrew his support of Don and said he planned to withdraw entirely from further speed boat ventures.

Lord Wakefield is said to have spent at least \$1,000,000 in the last few years promoting automobile, speedboat and airplane speed ventures.

Support For Grain Show
Halifax.—The Canadian Chamber of Commerce pledged strong support to the promoters of the 1933 world's grain exhibition and conference at Regina. A committee representative of all parts of Canada will be organized for the purpose of stimulating a dominion-wide interest in this important event.

Move Made To Lengthen The Shipping Season Out Of Churchill Port

Ottawa, Ont.—The Canadian government is moving to lengthen the shipping season out of Churchill, Manitoba's seaport on Hudson Bay, which, under existing insurance regulations, will have finished its first season of activity on a commercial basis at the end of this month.

Lowest insurance rates on shipping through Hudson Strait expire September 30. By paying additional insurance it can be extended to October 7.

The government marine department has made representations to the marine insurance underwriters against the insurance expiration date. It was urged here, urging the use of a fixed date arbitrarily set, the date

W. N. U. 1520

Germany To Build Battleship

New Cruiser Said To Be As Efficient As Ordinary Ship Twice As Large

Berlin, Germany.—Germany, having turned her back on the world disarmament conference, will begin, on October 1, to build her third "pocket battleship," another of the 10,000-ton cruisers said to be as efficient as a battleship of twice the size.

The admiralty issued an order recently for the laying of the keel. A few hours later the government published the text of a note to the chairman of the disarmament conference, notifying him that there will be no German representative present next Wednesday, September 21, when the conference is resumed at Geneva.

Germany cannot be expected to take part in negotiations with regard to measures of disarmament," Foreign Minister Von Neurath wrote to Arthur Henderson, the conference chairman, "until it is established that the solution which may be found is also to apply to Germany."

The text of the note was a reiteration of the German thesis expressed on several occasions by high government officials to the effect that Germany is willing to discuss any level, provided that the other nations reduce their armaments to the same point.

The new cruiser, whose sister ships cost approximately \$17,850,000 each, is within the limits specified by the Versailles treaty, but because of numerous improvements developed by German naval architects, these vessels are said to be much more formidable than that treaty contemplated.

British Motorists Pay More For Gasoline

Price Has Been Increased Nearly Twenty Per Cent

London, England.—British motorists were hit by an increase of nearly 20 per cent in gasoline prices, raising the standard grade to 30 cents a gallon.

The London Omnibus Company estimated the rise would increase its expenses more than \$200,000 a year. News of the increase caused a sharp rise in oil shares.

The growing army of small car owners had hoped the oil war which has given them cheaper gasoline would continue indefinitely but the inclusion of Roumania as Russia in an agreement ended the price cutting.

Kaye Don Marries

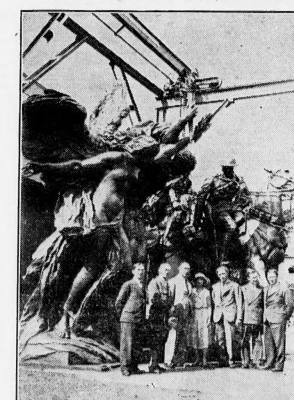

British Speed Boat Racer Weds American Society Girl

New York.—Kaye Don, the English sportsman, disclosed that he and Miss Jean Martin, 21-year-old society girl, were married at Greenwich, Conn.

The automobile and speed-boat racer acknowledged the marriage as he sailed alone for home. He said his bride of a day would follow him next week after she concludes "some business affairs."

He declared to say who performed the ceremony or to give any other details about it.

COMPLETION OF CANADA'S WAR MEMORIAL

Canada's War Memorial, which will in due course be erected on Parliament Hill, Ottawa, has now been completed at Farnborough, Kent, England, and for a short period will stand in Hyde Park, London, England. This picture shows the 18 March Brothers and sisters standing before the three gigantic figures which form part of the memorial. The memorial consists of a huge arch through which pass representatives of the services who responded to the call for men during the World War.

COMMENCES BIG WORK

James Purves, heraldic artist of London, Ontario, who has been given the task of inscribing some 68,000 names in the Book of Remembrance, which will be placed within the casquet of the Altar in the Memorial Chamber at Ottawa. The names will be written by hand on fine calfskin vellum.

James Purves, heraldic artist of London, Ontario, who has been given the task of inscribing some 68,000 names in the Book of Remembrance, which will be placed within the casquet of the Altar in the Memorial Chamber at Ottawa. The names will be written by hand on fine calfskin vellum.

United States Farmers

Buy Manitoba Land

More Than Two Hundred Families Coming To Canada

Winnipeg, Man.—Over long distance telephone from Des Moines, Iowa, Senator L. E. Francis confirmed his association with W. J. Whidden, Winnipeg, in the purchase of 10,000 acres of farmlands in Manitoba for United States farmers.

Mr. Whidden, who telephoned Senator Francis when showing a despatch from Des Moines quoting Mr. Francis as saying "nothing to it," showed the Canadian Press reporter the title to the property and his contract with the United States senator.

With other parties Mr. Whidden is negotiating for 25,000 more acres in Manitoba. More than 200 United States farmer families will settle on the total acreage, he said. These farmers are coming to Canada, he said, because of higher prices received for farm products in Canada and the fertility of Manitoba soil.

No Fall Session

No Early Sitting Of Alberta Legislature Expected

Edmonton, Alberta.—A fall session of the Alberta legislature is not likely, it is stated by Premier Brownlee, and the action of the Dominion Government in calling parliament for October 6 will not have any effect upon the situation in this province so far as its own house is concerned.

Unless some unexpected emergency arises, it will not be necessary to call a sitting of the legislature before Christmas, said Premier Brownlee. If economic or other conditions should become sufficiently serious, it might be found desirable, but there does not appear at present, the premier said, any reason for such action this fall. Mr. Brownlee intimated, however, that in any case as early a date as possible after the new year will be arranged for the regular session.

Heavy Property Damage Is Caused By Severe 'Quake In New Zealand

Farmers Hold Wheat

Alberta Farmers Show Tendency To Wait For Higher Prices

Calgary, Alberta.—Alberta farmers are showing a tendency to hold their wheat until higher prices appear, according to grain trade heads in Calgary. Farmers are being given an average price of 32 cents per bushel No. 1 Northern.

Alberta wheat pool officials state farmers feel grain should be held at all places where facilities are available. Storage places, however, are lacking in some centres and it is feared congestion may result in many districts.

Some farmers are urging that coarse grains also be retained until prices improve. They point out that present prices made delivery hardly worth while as No. 2 C.W. oats brought only 18 cents per bushel, No. 1 C.W. barley 12 cents, and No. 2 C.W. rye 13½ cents.

Pool heads strongly denied farmers in some districts were forming organizations for the purpose of holding all their crops.

Slayer Pays Penalty

Russian Who Shot French President Dies On Guillotine

Paris, France.—Paul Gorgoulou, half-mad Russian adventurer, died on the guillotine at Saint Pierre for the assassination of President Paul Doumer of France. The knife of the guillotine fell at dawn 6:03 a.m.

"The Russian fanatic's last hope of escaping the razor-edged knife of the guillotine was shattered when President Albert Lebrun, who succeeded Doumer, rejected his appeal for a commutation."

Dr. Gorgoulou was not told of the president's decision until a half hour before his execution, in accordance with French law and custom. Then he was awakened by his guard and lawyers, informed of the appeal's failure, and led unceremoniously to the guillotine.

Sees Better Times

Speaker At Chamber Of Commerce Gathering Looks For Improvement

Halifax, N.S.—Declaring Canada is "on the threshold of the upswing," President W. L. McGregor, of Windsor, Ont., gave a keynote of optimism to the seventh annual convention of the Canadian Chamber of Commerce.

"I am glad to be able to state that it is not only my opinion, but the opinion of many leaders that we are on the threshold of the upswing," he said.

But Colonel McGregor wished to make it clear he was not suggesting the advent of recovery. "I would caution anybody seriously forward the idea of the advent of recovery with 14,000,000 unemployed on this continent alone," he asked. "He was wary of the spectacular rise in stock prices."

Germany's Demand For Armament Equality Receives Support

London, England.—Germany's demand for equality in armaments received enthusiastic support from Arthur Henderson, president of the world disarmament conference.

Speaking before the national peace council, Mr. Henderson, who was foreign secretary in the last British Labor cabinet, called upon the allied powers of the World War to carry out the disarmament provisions of the Treaty of Versailles.

"Why shouldn't the World War allies get together and recognize that what was said in their names in 1919 must bind them?" Mr. Henderson demanded.

"Why should they not publicly declare their intention to remove Germany's position of inferiority with all possible haste and to restore Germany's equality in military status?"

Mr. Henderson will leave for Geneva to make preparations for the impending resumption of the disarmament conference. Admitting frankly that he was not satisfied with the results of the conference thus far, he asserted it would be an "intolerable jest" if it failed.

Wellington, N.Z.—Much property damage was caused, but apparently there was no loss of life, when a severe earthquake struck the Hawkes Bay section without any preliminary warning tremors.

The epicentre of the earthquake was estimated to be only 30 miles east of Waipiro Bay and the disturbances were deep-seated. The shock struck the town of Wairoa with great suddenness and several buildings were destroyed. An employee of the Star newspaper was injured when a falling firework machine crashed through a partition.

At the Wairoa hospital, patients behaved with admirable calm when the shock came, and it did not do much damage to the main hospital building. The nearby nurses' residence, which had just been built, and was waiting for official opening, was, however, destroyed.

The nurses who had already spent two winters in tents, following the destruction of their former home in the earthquake more than a year ago, will be compelled to remain there.

Steadily rain following the "quake added to the difficulties of those who lost their homes and are compelled to camp out. The rural districts suffered equally with the crowded urban sections and at one small settlement a six-roomed house, built on piles, collapsed.

At Gisborne minor shocks continued and residents were in danger from falling chimneys, one street holding the wreckage of nearly 200 of these. The tower of the Gisborne post office was fractured.

Numerous slips on the hillsides around Gisborne occurred.

In February, 1931, 200 persons were killed and 1,000 were injured in a devastating earthquake which caused heavy damage in the Hawkes Bay region.

Since then there has been numerous but less serious quakes, none of which has done extensive damage.

Trade With Russia

Report Canada Will Exchange Aluminium Products For Crude Oil

New York.—The Aluminium Company of Canada, Limited, has contracted with the Soviet government to exchange aluminium wire for crude oil, says the New York Times. The first shipments of oil are now en route to Montreal, the paper says.

The transaction is described by the newspaper as the first of a series by which Russia will buy goods from Canadian industries through the barter system.

An arrangement has been made by Aluminum with the La Salle Oil Company for the purpose to refine oil and to distribute the product throughout Canada, the paper proceeds.

Russia will utilize the aluminum wire in the manufacture of munitions, it is said, and is negotiating for the barter of oil and coal and other raw materials in exchange for items essential to the success of its industrial development.

He asserted he could not believe most crucial question was if Germany withdrew from the conference she might entraine opinion in Europe.

"I hope the better way will be taken," he asserted he could not believe most crucial question was if Germany withdrew from the conference she might entraine opinion in Europe.

"I hope the better way will be taken," he asserted he could not believe most crucial question was if Germany withdrew from the conference she might entraine opinion in Europe.

"I hope the better way will be taken," he asserted he could not believe most crucial question was if Germany withdrew from the conference she might entraine opinion in Europe.

Challenge Government Statements As to Possibilities of Commercial Fishing In Hudson Bay Waters

Strong criticism of the Dominion Government report on the commercial fishing possibilities of Hudson Bay and Straits is made in an analysis prepared by the Fish Commission of the Industrial Development Board of Manitoba, following release of the findings of the Hachey investigations of 1930.

Mr. Hachey's statement that "as a result of the total covering the whole of Hudson Bay, not a single commercial fish was taken, hence it is quite easy to arrive at a definite conclusion that a deep water fishery of commercial importance does not exist in Hudson Bay," is challenged by the Committee with abundant evidence gathered from eminent authorities. This evidence indicates that commercial fish in substantial quantities do exist in both the Bay and the Straits.

The committee points out that, although the expedition left Halifax on July 26, returning on September 20, it actually spent only 90 hours in fishing operations.

Seven hours 15 minutes with hand lines; 12 hours 15 minutes with drift nets; 2 hours 15 minutes with long lines; 37 hours 50 minutes on trawling operations.

It further points out that, although the superficial area of Hudson Bay is 576,000 square miles, the record of sailing times supplied by Mr. Hachey shows that the expedition traversed, in the process of investigation, less than 5,000 nautical miles.

The report refers further to the fact that for seven days investigation was conducted without bait.

The committee's report gives detailed information regarding the investigation of Dr. Alexander Hachey, who is attached to the Biological Board of Canada, at the University of Manitoba. This information proves the presence of commercial fish in Hudson Bay. Dr. Hachey has in his possession specimens of cod caught by Mr. Hachey during his expedition.

These cod are very small and young and thus might not possibly be brought within Mr. Hachey's category of "commercial fish," but the committee claims they constitute definite evidence that cod do exist in Hudson Bay and that the scientific evidence submitted by Mr. Hachey to the effect that the waters of the Bay were too cold for reproduction, is open to question.

Dr. Hachey is an eminent authority on the fish industry and has in his possession records of other expeditions into the White Sea and Arctic Ocean, in which the latitude traversed and the equipment used are almost exactly similar to those of Mr. Hachey's expedition. This information indicates that had the Hachey expedition continued operations into September, it is quite possible that they would have found an entirely different situation in connection with the supply of cod in Hudson Bay waters.

In the month of September, the Russian expedition found gigantic schools of cod in almost exactly the latitude of Hudson Strait and under similar conditions all around, except that their expedition continued a little later in the season. Mr. Hachey, with Halifax as his base and having to return before winter set in, could not prolong his investigations to that date, but could not anyone working from Halifax. But an expedition working from Churchill could do so and might conceivably find cod in September.

Should Eat More Cheese

Canadian cods do much for a great industry as well as for the health of their own sustenance in the use of a cheap and nutritious diet by a greater consumption of cheese. It should be made a staple food and be found on the table at all times.

Over 231 million acres were sown to wheat in the world last year.

Much Ado About Nothing

"So you told Mrs. Brown, did you? And what did Mrs. Brown say?" the defending counsel asked the witness.

Opposing counsel objected to the question as irrelevant, and a long and heated argument ensued before the judge allowed the question to be put.

"Now," exclaimed the triumphant counsel turning again to the witness, "what did Mrs. Brown say?"

"Nothing," was the reply.

W. N. U. 1940

Combine Harvester and Wheat Quality

Complaints Made That Grain Goes Out Of Condition In Storage

The combine has come into the Canadian West in large numbers in the last few years, and complaints have come from grain companies, who have to keep grain in storage in elevators, that the grain goes out of condition in storage. They claim that the grain appears to be "straitened" when it comes in (i.e. containing not over 14.5 per cent moisture), but that it spoils in storage, and when they look into its history they find that it is combined grain, cut and threshed without curing in the field.

The committee has arranged to attack this problem in a comprehensive way in all three provinces this season. Starting with a survey of the moisture content of the standing crop as it approaches maturity, numerous samples will then be taken from different types of harvesting and threshing methods, including the binder, the combine-sweeper, the straight combine, and the header-draw machine. The combine-operators of both farmers and grain men has been secured, so that the grain can be followed through storage to the final changes in quality. Fundamental studies have been started on the process of "sweating" in storage. Out of the whole investigation it is hoped to obtain information that will make possible a statement of what is safe to do, whether the new methods of harvesting should be modified, or whether they are safe if practised with suitable precautions.

Wheat Exports

Sharp Increase Is Shown As Compared With Last Year

A sharp increase in the export of wheat, with western Canada's new season export, Churchill, taking its place in the record, is shown in a report issued by the Dominion Bureau of Statistics.

In the five weeks ended September 1, export clearances amounted to 18,732,479 bushels. This compares with 10,473,083 bushels for the corresponding period last year. Practically one-half the clearances since August 1 have been through the port of Montreal, while Vancouver has handled about one-quarter of total clearances.

Shipments from Churchill totalled 823,713 bushels during the five-week period. Both Montreal, with 5,517,500 bushels cleared, and Vancouver, 4,017,145 bushels, show heavy increases as compared with a year ago.

A feature of the bureau report is the statement that the clearances of Canadian grain through United States ports show a marked decrease. The shipments since August 1 have totalled only 1,073,743 bushels compared with 3,358,000 bushels shipped during the same period last year.

University Work Co-Ordination

Working Plan For Four Western Institutions Has Possibilities

Co-ordination of the work of the four provincial universities in western Canada is not a new subject, but it has become a new subject in the eyes of Dr. James A. McLean, president of the University of Manitoba. The matter has been considered from time to time by a committee of the Canadian universities conference.

In Dr. McLean's opinion, the proposal contains possibilities worthy of attention. He had not heard of latest proposal of Premier Brownlee of Alberta and declined to discuss the matter in detail. On the angles from which the question had been considered in the past was the emphasis in certain universities on some of the professional schools. For instance, the University of British Columbia might develop its school of marine engineering to a high degree and leave to other universities the task of developing high grade schools in other branches. By co-operation and agreement along this line there was an opportunity of avoiding unnecessary duplication and saving expenses.

Much Ado About Nothing

"So you told Mrs. Brown, did you? And what did Mrs. Brown say?" the defending counsel asked the witness.

Opposing counsel objected to the question as irrelevant, and a long and heated argument ensued before the judge allowed the question to be put.

"Now," exclaimed the triumphant counsel turning again to the witness, "what did Mrs. Brown say?"

"Nothing," was the reply.

Arranging For World's Fifth Poultry Congress

Italy Making Great Preparations For Show Next Year

Prof. Alessandro Ghigi, director-general of the 1933 World's Poultry Congress, was in Ottawa recently in connection with the fifth congress. Prof. Ghigi interviewed the Federal Minister of Agriculture concerning Canada's participation in the congress, which takes place in Rome, September, 1933. In addition to this he discussed with Canadian members of the World's Poultry Science Council details of the congress.

According to the congress director-general, Italy is making great preparations for this event. The show will take place in the ancient market of the Trojans. The "market" is a circular gallery, six stories high, with an old Roman "road" leading to each tier. From these "roads" open dozens of rooms in which the exhibits will be placed. The King of Italy is the Royal patron and will probably open the congress in person. Mussolini heartily endorses the congress and it is expected will be present some time during the exhibition to meet the delegates.

Farms In Canada

Heavy Increase In Number Of Farms In Last Ten Years

There were 17,574 farms in Canada at the time of the 1931 census than in 1921, according to figures issued by the Dominion Bureau of Statistics. The total for 1931 was 728,664, and for 1921 it was 711,090.

There were decreases in the eastern provinces from Ontario to the sea, but increases in all the other provinces. Saskatchewan showed an increase of 17,021 in the decade. Alberta, 14,454, British Columbia 4,106, and Manitoba 947. There were 41 farms in the Yukon.

Prince Edward Island had a decrease of 836; Nova Scotia, 7,988; New Brunswick, 26,930; Quebec, 1,462, and Ontario, 8,879.

There was a total of 588,239 farms owned by their occupants, 74,382 tenanted and 67,942 partially owned. Full ownership of farms decreased 10 per cent, but so did land in tenures. Farmers increased 33 per cent.

Empire Trade Ship

May Sail From England For Canada Next Spring

Response from manufacturers and exporters in the United Kingdom led to an invitation to display their goods for the benefit of Canadian buyers at Montreal on the liner "Laurentic" has not been sufficient to justify the sailing of the vessel on October 1.

Numerous firms have indicated they are awaiting publication by the United Kingdom and Canadian Government the decisions arrived at during the Imperial Conference at Ottawa before exhibiting their goods.

As these decisions will probably not be made public before the end of October it is hoped the empire trade ship will sail for the Dominion next spring.

"Getting Even" Is Costly

Means Harm To Higher Character and Self-Respect

You cannot "get even" with one who does you an injury except by getting on his level, that is what evenness means. No possible ill from without can be equal to the harm you can inflict upon yourself by sinning against your own higher character and self-respect. "Getting even" with wrong, injustice and selfishness is too costly an indulgence to be allowed.

This year, 4,000,000 British subjects in England must pay an income tax. Last year the number was 2,250,000.

Trains Halted By Ants

Contact In Signal Box

Ants, common red ants, breaking traffic on the Louisiana division of the Texas & Pacific Railroad for a time, much to the annoyance of everybody.

Passenger train No. 24, eastbound, encountered a red light near Scottsville and halted. Trains were unable to find the cause. Train No. 26 had the same trouble. An investigation revealed that ants had worked into the signal box and formed the contact. Many ants had been electrocuted, breaking the current and causing the signal to remain red.

Foreman: "Hi, why aren't you getting on with yer washing?"

Workman: "Bill accidentally fed the pall to the minute hand, but it'll be round again in half an hour!"—The Humorist, London, England.

Winnipeg Newspaper Union

(By Ruth Rogers)

Intelligence and Ability

Are One and the Same Thing, So Scientists Say

Intelligence and ability are the same thing, and both are "inborn," the British Association for the Advancement of Science was told.

The man with the highest intelligence is the man with the greatest number of inborn abilities. Prof. W. McDougall, noted psychologist, said. The difference in intelligence between man and the lower animals is really a difference in inborn abilities.

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things—propensities or "natural bent," and abilities. Instinct is a close linking-up of a "natural bent" with some particular ability. This close combination of the two governs actions of lower animals.

The secret of the ability of migrating birds to find their way accurately over long distances probably lies in powerful eyesight, enabling them to note landmarks. Prof. C. G. Patten told the association.

He expressed doubt that birds have an instinctive "sense of direction." Young birds are guided by older birds who have been over the route before.

Facts About Tobacco

Weed Is Grown In Nearly Every Province Of The Dominion

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa:

Tobacco growing was introduced by French settlers in the early colonial days.

Government assistance was first given in 1785.

In the year of the first decennial census, production was estimated at 399,870 pounds for Ontario and 1,195,345 pounds for Quebec.

There were some 7,200 farms producing tobacco in Ontario and Quebec, and approximately 70,000 persons were engaged in the production or manufacture of tobacco and its products.

Tobacco is grown in nearly every province in the Dominion.

Canada's production of commercial tobacco for 1931 was estimated at 51,000,000 pounds.

Backboard May Have To Go

Residents Of Isleboro On Penobscot Bay Want Cars

Few families are secure against the forward march of the automobile. Even Bermuda, in mid-ocean, has to be always on the alert to vote down the motor threat to her ropes. On Isleboro, however, on Penobscot Bay, the backboard still reigns. Ten miles from shore, Isleboro has wandered off the automobile, and most of the summer residents would gladly keep the machine age at arm's length indefinitely. But the permanent residents have been restless at being deprived of a lively and entertaining introduction of civilization. They want automobiles more than they want quiet and are likely to get them, for the issue is coming up at a special town meeting.

Support Is Promised

Canadian Provinces All Interested In Success Of Grain Show

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference, according to reports from those who attended the recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buckle, Minister of Agriculture and chairman of the exhibition and executive committee, conferred with representatives of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

Scotland Wants Quiet Sunday

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading. Sunday excursions and Sunday movies.

Compulsory insurance for autobus passengers has been decreed in Yugoslavia.

Survey Results In Better Picture Of Weed Problem In The West And Points To Possible Remedy

Intelligence and ability are the same thing, and both are "inborn," the British Association for the Advancement of Science was told.

The man with the highest intelligence is the man with the greatest number of inborn abilities. Prof. W. McDougall, noted psychologist, said. The difference in intelligence between man and the lower animals is really a difference in inborn abilities.

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things—propensities or "natural bent," and abilities. Instinct is a close linking-up of a "natural bent" with some particular ability. This close combination of the two governs actions of lower animals.

The secret of the ability of migrating birds to find their way accurately over long distances probably lies in powerful eyesight, enabling them to note landmarks. Prof. C. G. Patten told the association.

He expressed doubt that birds have an instinctive "sense of direction." Young birds are guided by older birds who have been over the route before.

Facts About Tobacco

Weed Is Grown In Nearly Every Province Of The Dominion

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa:

Tobacco growing was introduced by French settlers in the early colonial days.

Government assistance was first given in 1785.

In the year of the first decennial census, production was estimated at 399,870 pounds for Ontario and 1,195,345 pounds for Quebec.

There were some 7,200 farms producing tobacco in Ontario and Quebec, and approximately 70,000 persons were engaged in the production or manufacture of tobacco and its products.

Tobacco is grown in nearly every province in the Dominion.

Canada's production of commercial tobacco for 1931 was estimated at 51,000,000 pounds.

Backboard May Have To Go

Residents Of Isleboro On Penobscot Bay Want Cars

Few families are secure against the forward march of the automobile. Even Bermuda, in mid-ocean, has to be always on the alert to vote down the motor threat to her ropes. On Isleboro, however, on Penobscot Bay, the backboard still reigns. Ten miles from shore, Isleboro has wandered off the automobile, and most of the summer residents would gladly keep the machine age at arm's length indefinitely. But the permanent residents have been restless at being deprived of a lively and entertaining introduction of civilization. They want automobiles more than they want quiet and are likely to get them, for the issue is coming up at a special town meeting.

Support Is Promised

Canadian Provinces All Interested In Success Of Grain Show

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference, according to reports from those who attended the recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buckle, Minister of Agriculture and chairman of the exhibition and executive committee, conferred with representatives of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

Scotland Wants Quiet Sunday

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading. Sunday excursions and Sunday movies.

Compulsory insurance for autobus passengers has been decreed in Yugoslavia.

"Darling, I am tired. I am half dead."

"Just like you to do something by halves!"—Montquie, Charleroi.

Never say die—say damn.

Every married man knows
that the first hundred biscuits
are the hardest.

Miss M. Nagel, left for Lead-
er, Sask., on Saturday.

Wendell McRae left for Cal-
gary on Tuesday morning.

Dr. McNeill was under the
weather this week with an at-
tack of "flu."

Weather of the past week
has been of the wintry brand."

A number from here attended
the dance at Leader last Friday
night.

Hunters apparently have been
very successful in their outings
in the district, and the geese and
ducks seem to be fairly plenti-
ful.

The annual dinner in aid of
the Empress Catholic Church,
to be held on Saturday, Octo-
ber 22nd, will begin at 5 p.m.
The prices will be, adults 50
cents, and those under fifteen,
25 cents.

Dr. Wallis, the eyesight spe-
cialist, will be in town, Sunday,
to see him.

Bruce Silverthorne, Jr., of
Social Plains underwent an ap-
pendix operation at the local
hospital on Wednesday.

Lake of the Woods will have
a sale of Flour, Rolled Oats, etc.,
on track, about October 28th.
See us at the elevator for Spe-
cial prices of flour.

Dr. Wallis, Eyesight Special-
ist of Medicine Hat, will be
at the Empress Hotel on Sun-
day, October 16th, from 1.30 to
4.30 p.m. Make your appoint-
ments at Empress Drug Store.

The Women's Missionary So-
ciety will meet at the home of
Mrs. Geo. A. Shields, on Wed-
nesday afternoon, October 19,
at three o'clock.

Doddsland, and other neigh-
boring towns, is talking of
making the skating rink enclo-
sure out of baled straw.—Budget,
Loverna.

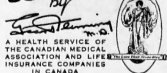

Mr. and Mrs. J. N. Anderson,
and children made a trip to
Stevley, Alta., this week, and
they brought back their daugh-
ter, June, who had been visit-
ing with Mr. and Mrs. R. Bestie
and family. Mrs. Beattie
accompanied them and is the
guest of her sister, Mrs. Ander-
son.

HEALTH

Deafness

Deafness is a serious matter.
It interferes with education
when it occurs early in life, and
later it is a handicap in busi-
ness. In addition, the deaf
are shut out from much of the
enjoyment of life, and from
free and easy communication
with their friends.

The ear is divided into three
parts. The external ear catch-
es the sound, turns it into a
vibration about one inch in length,
at the end of which is found
the eardrum. Beyond the drum
is the middle ear, which is con-
nected with the upper part of
the throat by a tube. Further
back, encased in bone, is the
inner ear.

Deafness is largely prevent-
able. Very few people are born
deaf. In order that deafness
may be kept prevented, the
ears must be kept healthy. The
hairs which line the ear canal
should never be pulled out, as
serious and painful infections,
like boils, often result. Matches.

A meeting of Victoria Lodge
No. 82, A. F. & A. M., of Alaska,
will be held in the Empress
Theatre, on Tuesday, October
18, 1932 at 8 p.m. Visiting broth-
ers are welcome.

DOUBLE COMEDY

Saturday, Oct. 15th
All Talking. You'll want to
see this Big programme

toothpicks, knitting needles,
hair pins, finger tips or other
such articles should not be used
to clean the ears or to scratch
them if itching occurs. There
is an old saying that "you should
never put anything into your
ear smaller than your elbow."

Leave your ears alone and
leave your children's ears alone.
Do not attempt to remove wax,
you will likely press some of
it against the drum and so cause
so harm. The ears are too pre-
cious to entrust to unskilled
hands.

Deafness usually has its be-
ginning in disease of the nose
and throat, from whence the
disease spreads up the tube
which connects the throat and
middle ear. It is obvious that
the health of the middle ear
depends upon the health of the
nose and throat.

Any condition which causes
inflammation of the nose and
throat is apt to spread up the
middle ear and set up inflam-
mation there; tissues are des-
troyed, pus is formed and the

ear discharges. It is in this
way that the common cold,
measles, scarlet fever, diphtheria,
in, diseased tonsils and adenoids
are the underlying causes of
middle ear disease which
leads to deafness in late years.

The nose should not be wash-
ed out except under a doctor's
direction, as in so doing infec-
tion may be forced up into the
middle ear. For the same reason,
the nose should never be
blown violently, and above all
never when there is a cold in
the head.

The prevention of deafness
depends chiefly upon the proper
care of common colds, adequate
treatment of measles and other
infectious, prevention of diph-
theria, removal of diseased ton-
sils and adenoids, and blowing
the nose properly.

Leave your ears alone. Keep
your nose and throat healthy,
secure skilled care if there is
anything wrong, and you will
retain the use of one of your
most valued organs of sense,
the ear.

Once there was an elephant
and a flea going over a bridge.
When they got over the bridge
the flea turned to the elephant
and said, "We sure shook that
one, didn't we, big boy?"

"We don't care what you
think, we want to know what
you know," shouted the lawyer.
"Well, I may as well get off
the stand, then," said the wit-
ness. "I can't talk without
thinking, I ain't no lawyer."
